AT THE ALMS-HOUSE. I am so old, so old. Well a day! Foursecre and more years have passed

And brought but labor and sorrow.

I'm wrinkled and gray—bent like a bow,
My speech gets foolish, so old, you know,
But I shall be younger to morrow.

Slay with me, Hansah, and chat a bit, My mind keeps running on the things that this

flit
Like the shadows there on the wall.
Thicker and faster they come and go;
And I'm so old, and I think so slow,
That I cannot remember all.

But my good man was here at even; And children—there used to be seven— Were shouting at play in the lane. lark I seems to me some one was calling, Or was it the elm branches falling, Wind-to-sed, 'gainst the cracked window-pane !

Nigh about forty years my good man, Stir the file, Hannah, bright if you can, What was I saying ? O, dead, dead, Dead lies my good man; and one, two, three, More, perhaps—I'm forgetful, you see— Of my children lie round his bed.

For all the good they've ever done me;
But 2 should have died years ago.
Now they've habes of their own to cherish,
And the old mother's left to perich,
It's the way of the world, you know. dust now, I was plucking white datales. They grow so thick over their faces. They covered them all from my right.

Now bring my black cloak, for I shiver, Now bring my mack cross, for 1 savet, Cook Hourah, I in nearing the River, The dear Loid is writing, close by. Fourscore years and move, all of sorrow; But I shall be young with to-morrow, So, pray let the old woman die.

THE REVENUE REPORT. In his report on the Revenue, Commiss louer Wells recommends the reduction of the navy expenditures to an amount merely sufficient to maintain the police of the seas, and preserve the public property from deterioration; the reduction of the army as 8000 as practicable; that no appropriation be made for ordinarce except what is necess pry for immediate use, or for fortifications beyond what is required to keep the same in repair; that no appropriations he made for public works, other than fortifications, except such as are of the most urgent necossity; that so long as the necessities of the nation are paramount to those of Individuals, no claims for damages sustained in consequence of the rebellion be either paid or considered; that the heads of the various departments be required by Congress to practice the most rigid economy, and to reduce their employes to the minimum humber requisite for the discharge of the public service; that no money be appropriated for the further purchase of foreign territory, and that no commercial treaty with any

He thinks the expenses of the government may thus be reduced to \$130,000,000 Ayear and a reduction of taxation will become practicable. A reduction in the annual expenditures of the War Department from \$83.811.555, as in 1867, to \$60,000,000. would allow a reduction of over 25 per cent on all the taxes now levied on manufactured products, exclusive of liquors, tobacco, and a few other articles generally classed under the head of luxuries, and still leave to the credit of this department, for its incressed necessities, growing out of a change in the circumstances of the country, a sum $\,200\,$ per cent, in advance of what was required in 1861.

foreign nation be ratified of a character cal-

culated materially to diminish the customs

A reduction in the expenditures of the Navy Department from thirty-one millions, the requirements of the last fiscal year, to fifteen millions would allow the doing away with the taxes on all manufactures of cotton and wool, iron and steel, boots, leather, and paper; being substantially the removal of all that are understood to be fadustrial laxes, so that a tex of \$8,73 per head would meet at present an annual expenditure of one hundred and forty millions for ordinary expenses, one hundred and thirty million: for interest, and fifty millions for the reduction of the principal and debt; and if the same rate of taxation be continued for the future, it will extinguish the principal of the debt in less than twenty years, even it to the above estimate of one hundred and forty millions for ordinary expenses be added a sum equal to \$2 per head on the over age againal increase of population, which average increase may be expected to augment the population of the United States, by the year 1681, to nearly sixty millions

This proposed rate of \$5.73 a head, which is only about three fourths of the rate of taxation paid in 1660, after reducing the rate of that year to gold, can be ob lained without a recounse to any of the in ternal taxes which materially impede production; and as the wealth of this country increases in a much more rapid ratio than population, the uniform rate of \$8.78 per capita will become annually less and less

Comparing the financial condition of the United States, with that of other nations, his conclusion is that the United States is "the only one of the leading nations of the world which is, at present, materially diminishing its acht and reducing its taxes; and the only one, moreover, which offers any substantial evidence of its ability to pay its debt within any definite period, or even anticipates the probability of any such oc-

HEFORT OF THE REVENUE. -- Revenue Commissioner Wells, in his report, states that the total reduction of the national debt octween Aug. 81,1865, and Nov. 1, 1867, 825 \$366,185,121, or an average of upwards of ten million dollars per month. The receipts of the Government from all sources in 1867 were four hundred and will be done at home. ninety millions of dollars; expenditures, three bundred and forty-six millions of dollars. The Commissioner advocates the strictest economy throughout all departments of the Government, and is confident the ordinary expenditures might be reduced to one hundred and forty millions of dollars per annum. He thinks a removal of all the internal taxes, which materially impede the writer of the paragraph had to drink production, and some slight modifications of the tariff, would be followed by a revival of domestic industry. It is understood that the Commissioner recommends a reduction of the tax on proof splirits to 50 cents per

> THE NEW YORK HERALD,---There is a eport that the proprietors of the New York Tribune are negotiating, -whether for them. selves or others is not stated, -- for the purselves or others is not stated,—for the purchase of the New York Herald, at the round sum of \$1,000,000. This statement is made in connection with a former report that Mr. Bennett had offered the establishment for \$1,100,000, and now offers it for \$100,000 less. It is also said that several of the leading writers and some fifty are playes have been discharged within a week

He was the author of several music books for church and sunday school use, and his little works called 'The Golden Chain," "Golden Shower, " 'Gaklen Censet" and "Golden Trio" had a wider circulation and influence than any other Sunday school music books ever published in this city.
